

NEW: **seculift** Back Protect Shock-Absorbing Protection for Fork Backs

Back Protect provides reliable protection during the transport of goods, safeguarding both the forklift forks and the load itself—particularly goods with sensitive surfaces or bulky and fragile items.

Made from high-quality polyurethane (PU), Back Protect is extremely durable and designed for demanding industrial use. Four powerful magnets, each with a holding force of 60 kg, ensure secure and easy attachment.

Its specially designed shape protects the particularly vulnerable inner corner of the forklift fork and helps prevent cracks and other damage.

Designed for permanent use, Back Protect can also be attached temporarily thanks to its magnetic mounting system. For larger forklifts, a second Back Protect can be added as an extension (mounting the units vertically).

Dimensions (LWH): 495 × 105 × 32 mm

Weight: 2.8 kg

Colors: Black, Red

- Protects sensitive surfaces and fragile goods
- Reduces vibration and dampens noise
- Provides optimal protection for forklift forks and load carriers
- Prevent damage to the vulnerable inner corner of the fork tine
- Magnetically attached to the vehicle body when not in use
- Extendable by stacking multiple units
- Special Colors available on request

Item-No. Black: SL-Back-Protect-S

Red: SL-Back-Protect-R
